For and on behalf of Continuity Partner: _____ **Operations Director**
Date issued: **03/07/2018** Expiry date: **02/07/2019**

The Business Resilience Score - explained

The Continuity Partner Resilience Score is an objective measure of how an organisation ranks against the 6 point Continuity Partner Business Resilience model.

Each of the measures are graded between 0 and 4 and are equally weighted. The combined score is averaged to give an overall Business Resilience score. The 6 key measures of the Continuity Partner best practice Business Resilience model are:

- 1. Business Continuity Policy & Senior Management Commitment**
- 2. Business Impact Analysis & Risk Assessment**
- 3. Business Continuity Plan**
- 4. Test, Review & Improve Process**
- 5. Threat Monitoring & Alerting Capability**
- 6. Crisis Management Capability**

Formal Continuity Partner certification is only provided to active Continuity Partner clients that have completed our detailed onboarding process. Continuity Partner do not certificate below Level 3 and the grading can be withdrawn at any time if the certified company fails to adequately mitigate identified risks.

For further information about the Business Resilience scoring and certification process, email Continuity Partner at enquiries@continuitypartner.com or call **+44 (0)1252 560331**
